Orders Page(Orders can be customized and tracked here, data is fetched from database)

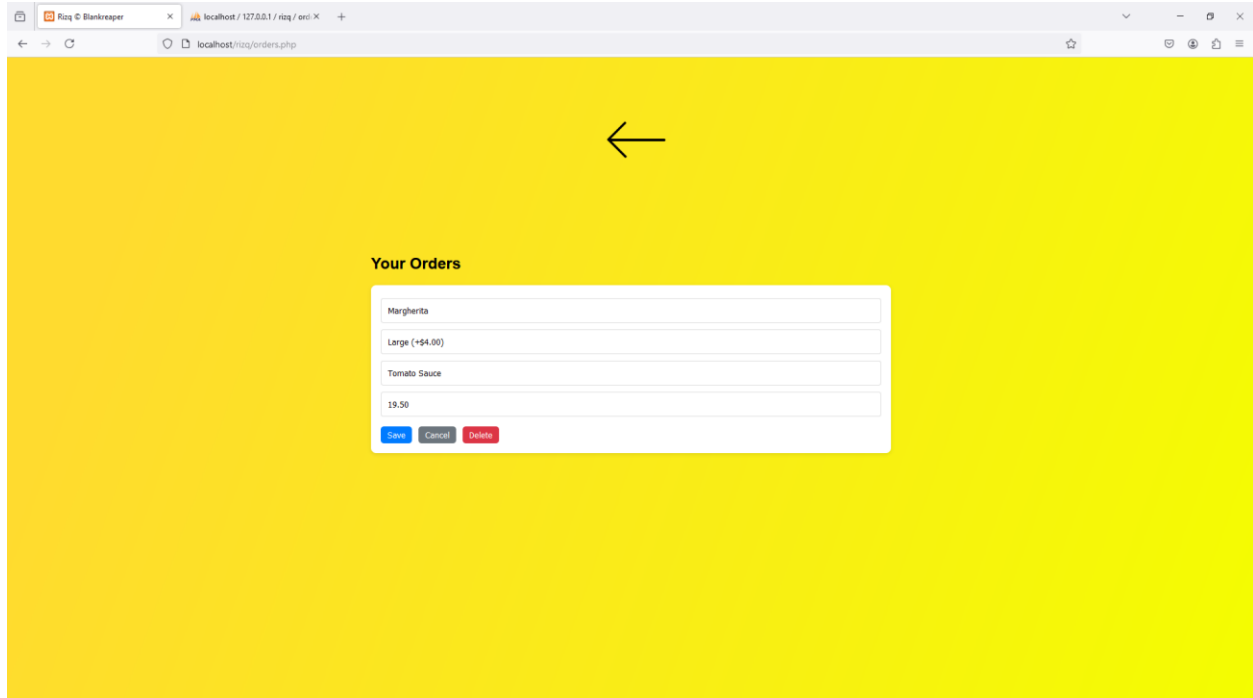

Ordered Item in Database

The screenshot shows the phpMyAdmin interface. On the left, a sidebar lists databases and tables, with 'orders' selected under the 'rizq' database. The main panel displays the 'orders' table structure and a single record.

id	name	email	item	size	addons	totalprice	paymenttype
1	shishir	shishir@gmail.com	Margherita	Large (+\$4.00)	Tomato Sauce, Barbecue Sauce (+\$1.00), Garlic Sauc...	19.50	bkash

Editing Ordered Item (It should make changes to the Database as well)

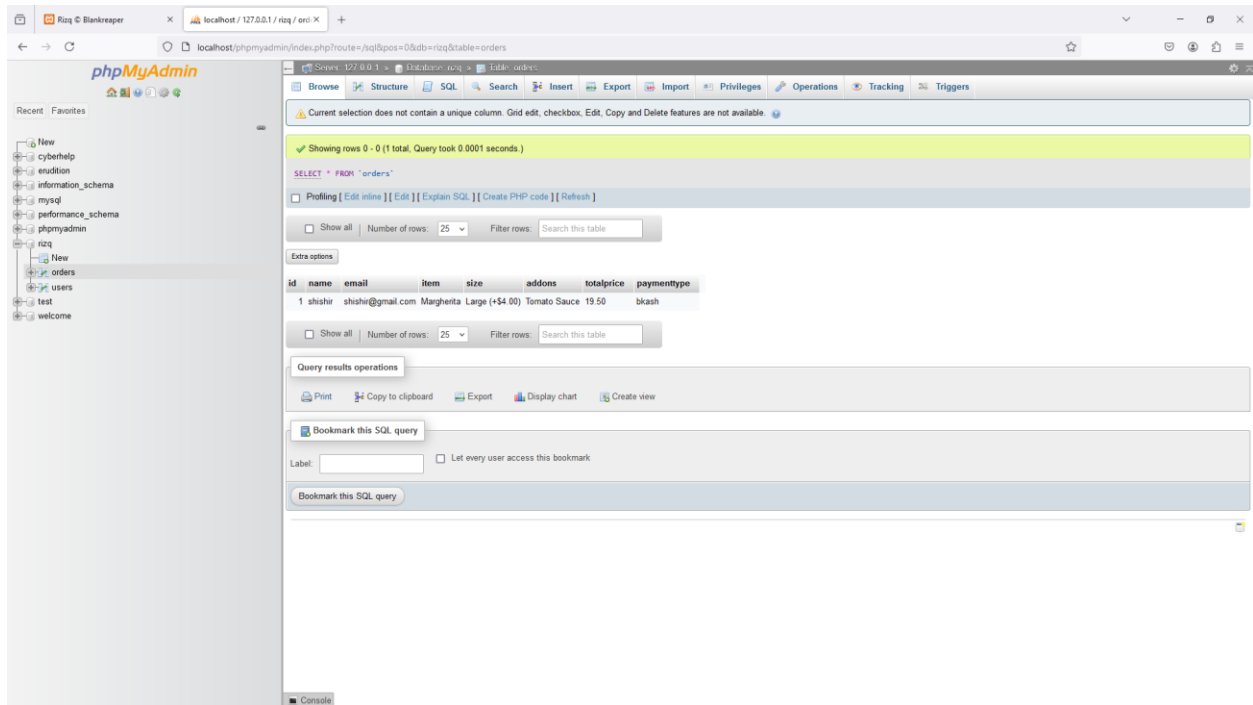

The screenshot shows a web application with a yellow background. A large yellow arrow points from the 'orders' table in the previous screenshot to this form. The form is titled 'Your Orders' and contains a table with the following data:

Margherita
Large (+\$4.00)
Tomato Sauce
19.50

At the bottom of the form are three buttons: 'Save' (blue), 'Cancel' (grey), and 'Delete' (red).

Updated Ordered Item in Database

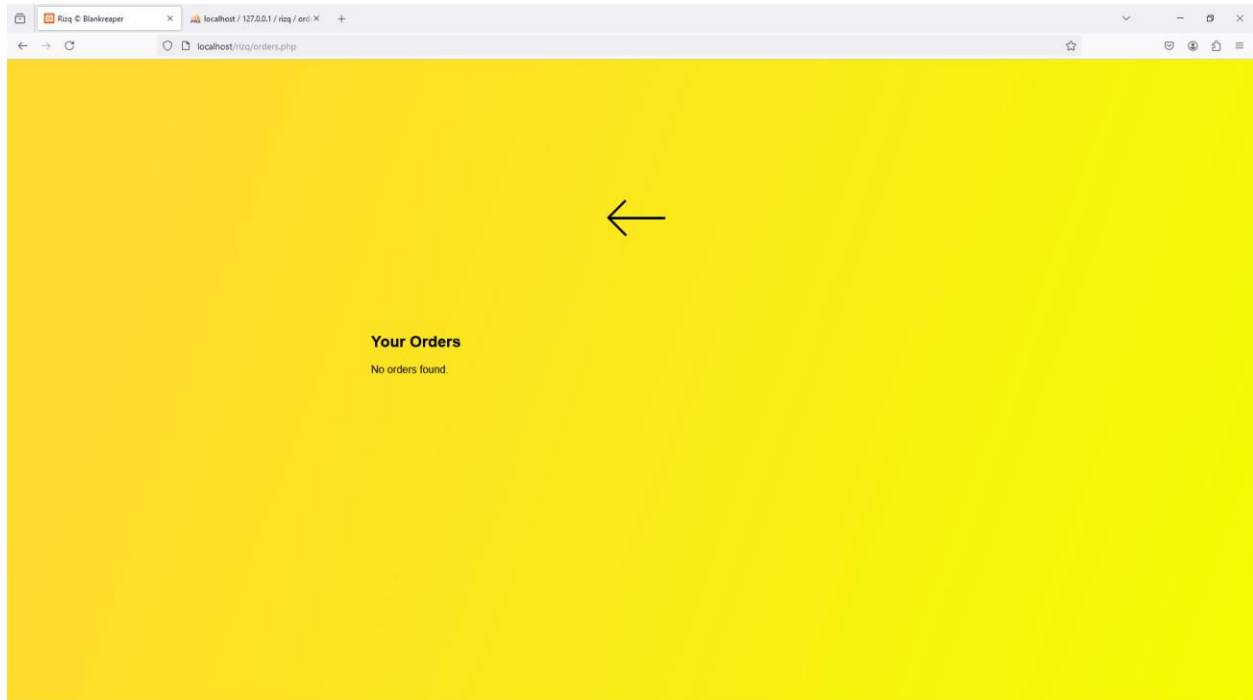

The screenshot shows the phpMyAdmin interface for a database named 'rizq'. The 'orders' table is selected, and the SQL query 'SELECT * FROM `orders`' is executed. The results show one row with the following data:

id	name	email	item	size	addons	totalprice	paymenttype
1	shshir	shshir@gmail.com	Margherita	Large (+\$4.00)	Tomato Sauce	19.50	bkash

The interface includes a sidebar with a database structure tree, a top navigation bar with various tools like 'Browse', 'Structure', 'SQL', 'Search', 'Insert', 'Export', 'Import', 'Privileges', 'Operations', 'Tracking', and 'Triggers'. A message at the top states: 'Current selection does not contain a unique column. Grid edit, checkbox, Edit, Copy and Delete features are not available.'

Deleted the Order

The screenshot shows a web application interface with a yellow background. A large black arrow points to the left, indicating a navigation action. Below the arrow, the text 'Your Orders' is displayed, followed by 'No orders found.' The browser's address bar shows the URL 'localhost/rizq/orders.php'.

Order is Deleted in Database as well

The screenshot shows the phpMyAdmin web interface in a browser. The left sidebar displays a database structure with the following items: New, cyberhelp, erudition, information_schema, mysql, performance_schema, phpmyadmin, rzq, and a 'New' dropdown menu containing orders, users, test, and welcome. The 'orders' table is selected. The main panel shows the SQL tab with the query `SELECT * FROM `orders``. A message at the top states: 'MySQL returned an empty result set (i.e. zero rows). (Query took 0.0001 seconds.)'. Below the query, there are buttons for 'Query results operations', 'Create view', and 'Bookmark this SQL query'. The 'Bookmark this SQL query' section includes a 'Label' input field and a checkbox labeled 'Let every user access this bookmark'. The bottom of the interface shows a 'Console' tab.
